

AIXYZ Fiverr Fulfillment Workflow

How buyer requirements become a clear scoped delivery without moving official Fiverr business off platform.

Buyer Path

A clean fulfillment process helps buyers feel guided without exposing internal operations.

Order	Buyer places the Fiverr order and keeps official communication in the Fiverr thread.
Requirements	Buyer sends business details, access notes, goals, links, and deadlines through the intake path.
Build	AIXYZ prepares the page, chatbot, receptionist setup, or lead workflow inside the agreed scope.
Proof	Buyer receives screenshots, links, notes, or a handoff guide for review.
Delivery	Final official delivery stays on Fiverr for Fiverr clients.

Fiverr buyers: orders, payment, and official messages stay on Fiverr. No private client data is included in this deck.

Buyer Confidence

The workflow reduces confusion before revisions happen.

Clear Scope	Basic, Standard, and Premium packages set expectations before work begins.
No Password Sharing	Access should use approved invites or client-provided platform workflows.
Human Review	AI assists with content and intake, but final client-facing delivery is checked by a person.

Fiverr buyers: orders, payment, and official messages stay on Fiverr. No private client data is included in this deck.
